OBJECTIVE

Junior Frontend Developer graduate with hands-on experience building web applications using React.js, Nuxt.js, and Tailwind CSS.

Experienced in integrating frontend with backend systems and basic software testing.

Interested in developing user-friendly and reliable web applications.

EDUCATION

Bachelor of Science in Software Engineering

Nakhon Pathom Rajabhat University, Nakhon Pathom, Thailand

Graduated: January, 2026

SKILLS & TECHNOLOGIES

Frontend: React.js, Nuxt.js, Vue.js, Tailwind CSS, Bulma CSS

Tools: Git, Docker Desktop, Postman, Vite

Backend: Node.js, Express.js

Testing: Robot Framework, Selenium

Database: MongoDB, PostgreSQL

Additional: MySQL, Oracle, Firebase

EXPERIENCE

Frontend Developer Intern

Cyber Kings Consulting | [1 December – 31 March]

- Developed and maintained frontend features for a government-related web application using Nuxt.js and Tailwind CSS
- Built responsive and user-friendly interfaces based on user requirements, ensuring accessibility across multiple devices including mobile and desktop
- Developed PDF generation features for exporting and printing user data, supporting official documentation processes
- Translated UI/UX designs into functional web pages, improving usability and overall user experience
- Designed and implemented a disaster assistance request system for flood victims, including form submission and status tracking functionality
- Ensured smooth user interaction by validating form inputs and improving form flow for better user experience
- Collaborated with team members to refine interface design and support integration with backend systems
- Assisted in testing, debugging, and optimizing frontend performance to ensure stable and efficient application behavior

PROJECTS

Grade System Web Application

Tech: React.js, Node.js, Express.js, MongoDB

- Developed a web application to simplify grade submission and reduce manual errors in academic processes
- Built responsive and user-friendly interfaces using React.js and Tailwind CSS to support efficient data entry
- Designed and implemented RESTful APIs for managing student grade data and submission workflows
- Implemented form validation and error handling to improve data accuracy and minimize user input errors
- Streamlined the grade submission process, improving efficiency compared to manual workflows

E-commerce Web Application

Tech: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce platform supporting product management, user authentication, and order processing
- Designed and implemented RESTful APIs for handling product data, user accounts, and transactions
- Built secure authentication and authorization mechanisms to protect user data
- Developed responsive UI for product browsing, cart management, and checkout flow
- Managed application state using Context API / Redux to ensure smooth user interactions

Chat Web Application

Tech: React.js, Node.js, Socket.io

- Developed a real-time chat application supporting instant messaging between users
- Implemented WebSocket communication using Socket.io for real-time data updates
- Built interactive chat interfaces for message display and user interaction
- Managed real-time message synchronization without page reload
- Implemented basic user session handling for communication between users
